

How to be Kingdom-minded in

Prayer for Missions

Let this prayer guide yours as you pray for the gospel to spread and people in need of hope and compassion to receive it.

Our Church

Pray for Calvary Church to be on mission in the world. May we be reminded that each one of us is called to be part of God's mission in a unique way, and may that increase our faith in and love for Jesus Christ and create a zeal within us to give of ourselves and build life-giving relationships with others. Show us opportunities to share the gospel through acts of service that meet tangible needs and through the use of words full of truth and love.

Our Community

Pray for our neighbors in need of safety, healing, and restoration. Help us to see the people around us that are in need of compassion and to look for ways in which we can make an impact. Equip community leaders and those serving our neighbors in government, education and social services with wisdom and compassion. Create a spirit of unity, one that celebrates diversity while recognizing our common humanity and need for a Savior, so that the neighborhoods around our church will thrive and our city will too.

Our Partners

Increase the number of people willing to join our partners in serving and ministering to people. Equip those who make this their full or part-time work so that they have strength for the ministry and rest when they need it. Provide political stability in countries and communities where it's needed – and if not that, then provide protection for our partners – in order to ensure freedom to share the gospel, foster development, build financial support, and find wise solutions to practical problems.

The World

Grow the global church and remove obstacles that hinder reaching the unreached. Connect our brothers and sisters to one another so that we may pray and encourage one another. Sustain and renew workers who are bringing the gospel to dark places, and prepare the hearts of those who will be hearing the gospel.

All for your glory and the good of the world!
